

# Support staff to take action in an online harm situation

## Support your staff member to deal with online harm:

Provide your staff member with an **action plan** and offer to support them to work through the steps. Note that as part of contacting Netsafe, it's suggested that the staff member:

- gathers digital evidence (unless objectionable content is involved).
- reports the online harm to the platform(s) involved.

It is possible to contact Netsafe on a staff member's behalf. However, Netsafe's actions may be limited unless the staff member directly provides consent for you to act on their behalf.

Contact Netsafe for advice, support and to report online harm.
